

PINTEREST BOARD

OTH 560 CLINICAL REASONING III

For this assignment, each team member will be invited by the instructor to a collaborative team Pinterest board based on the diagnosis of your case study. Each team member will need to “pin” at a minimum 5 pins related to the case study.

At a minimum, your pins must include:

1. A research article (use of EBP)
2. Treatment technique
3. Theory or frame of reference or model of practice
4. Collaboration with other professions or specialists
5. One international resource
6. Evaluation or assessment
7. Discharge planning or documentation

One pin may meet more than one of these areas. For example, if you pinned something about the Canadian Occupational Performance Measure as an assessment measure for your case study you would be addressing both evaluation/assessment and an international resource.

You can “pin” items both by searching within Pinterest but also by adding a “pin button” to your browser to pin from the internet. Also, remember that you must insure that the information you pin is trustworthy and accurate. Five criteria for evaluating websites include Accuracy, Authority, Objectivity, Currency, and Coverage (this was covered in OTH 360). You can also look at <http://www.lib.umd.edu/tl/guides/evaluating-web#checklist>

For each pin, you **MUST** caption your pin. This includes the following information:

- Your name must be the first item in the caption
- 2 – 3 sentences relating the pin to the diagnosis and/or your case study

PINS MUST BE DIFFERENT FOR EACH TEAM MEMBER SO PLEASE ENSURE THAT YOU ARE LOOKING AT AND COLLABORATING WITH OTHERS WHO ARE PINNING TO YOUR BOARD.

Grading Guide:

TASK	POINTS	COMMENTS
Required number of pins	/2	
Pins meet above standards (1 – 7)	/5	
Name is included in caption of each pin	/1	
Each pin is related to case study	/2	
Caption relates pin to diagnosis or case study	/15	
TOTAL	/25
